# SOLAAR

SOLAAR, one light package where everything works together for the best light, for our customers, and for our planet.

## **LED Module:**

Over 200lm/W on a rotating support, efficient and easy to set up.

## **Solar panel:**

Monocrystalline Silicone technology offering over 20% photoelectric conversion, and once again thanks to the one package solution, it is easy to install. The solar panel power production is 80% higher than the high efficiency LED power consumption; this ensures that the battery is fully charged before dawn.

## **Battery:**

LiFePO4 technology, ensuring rated for over 2000 charge cycles, TWICE as much as standard LiPO batteries. The promise of a long lasting light.

They also pack enough capacity to last up to 13 hours on each full charge.

## **Casing:**

Pure aluminium with a “one fits all” mounting system, ensuring that you only need one fixture to fit all different mounting configurations, with the proper mounting accessory.

## **Light Management:**

The light can be controlled via schedule timing, ambient lighting and motion sensing.

**3 YEARS  
GUARANTEE**
